Lean Construction
EDUCATION PROGRAM

Spring 2020 Class Schedule

The Lean Construction Education Program (LCEP) is AGC's 35-hour seven-unit curriculum aimed at minimizing costs and maximizing value through all phases of a construction project: planning, design, construction, activation, operations, maintenance, salvaging, and recycling.

Everyone involved in the construction process has incentive to get the project done faster and at a lower cost. The Project Owners wants to see tangible results for their investment, the Contractors and Designers want to do their job well and move on to the next project.

Learn the building blocks necessary to transform your projects into lean operating systems. Upon completion of all seven LCEP Units, you will be qualified to take an exam to earn AGC's Certificate of Management - Lean Construction (CM-LC), which is now offered at AGC of Colorado.

Unit 1: Variation in Production	March 12, 2020 8:00am-12:00pm
Unit 2: Pull in Production	March 12, 2020 1:00pm-5:00pm
