NEW CLASS
Online and Live
September 24 - October 22

This course is the first step on the path to develop construction supervisors. This live, instructor-led course consists of nine highly interactive sessions that focus on the knowledge and skills that every supervisor needs to be an efficient manager of people, time, equipment and materials. This course includes case studies, group activities, and provides jobsite exercises for skill development.

The 9 Learning Sessions:
Session 1: Team Management
Session 2: Project and Team Leadership
Session 3: Communication Skills
Session 4: Time Management and Project Scheduling
Session 5: Risk Management
Session 6: Construction Law and Contract Documents
Session 7: Problem Resolution
Session 8: Productivity and Cost Control
Session 9: Skills Development

Who Should Register:
This course is designed for aspiring front line leaders who are looking to learn entry level management skills to lead construction activities. Craft workers, foremen, project engineers or assistant project managers looking to advance his/her career in a new supervisory role will benefit from this course.

Presenters:
Tina Connett, Haselden Construction
Troy Bridges, Duro Electric
Aaron Blom, Architectural Concepts
Brad Fry, W.E. O'Neil Construction

AGC Member/$500
